

Site Risk Assessment

Date: _____ Assessment Done By: _____

Location: _____ Intended Use: _____

Legislation

1. Verified with local regulations for legal compliance: Y / N

Previous Use/Adjacent Use

2. Previous crops planted on land: _____
3. Has land been previously used for industrial or military use Y / N
If Yes explain: _____
4. Has land been previously used as a landfill or mining site: Y / N
If Yes explain: _____
5. Current vegetation on land if applicable: _____
6. Does adjacent use represent a food safety risk: Y / N (Identify the locations of nearby commercial animal operations, composting and potential sources for ingress by domestic and wild animals, and other contamination routes, such as flood water, intrusions, and dust that might lead to microbial contamination.

Soil Type

7. The structural suitability of soil adequate for intended crops: Y / N
8. The structural susceptibility of soil adequate to erosion: Y / N
9. The chemical suitability of soil good for intended crop: Y / N
10. The conformation, slope and drainage pattern of soil adequate to reduce flooding and erosion: Y / N

Water

11. Is the water appropriate quality for intended use: Y / N
12. Is there adequate availability for proposed growing season: Y / N
13. Proper authorization of use of water have been sustained: Y / N

Impact Analysis

14. Have all internal impact analysis been considered (noise, smoke, chemical contamination, spray drift, etc.)
List: _____

15. Have all external impact analysis been considered (adjacent farming activities, adequate labor, theft, pest, etc)
List: _____

Final Assessment of property: _____
