

Employee Hygiene Risk Assessment

Risk Assessment

We have determined the risks associated with employee hygiene to be the following:

- Disease and bacteria transmitted to fruit by direct hand contact of employees.
- Debris on fruit caused by mishandling of fruit.

Risk Mitigation

- Train visitors and workers in proper hygiene procedures.
- Monitor hand washing of workers and retrain as necessary.
- Do not allow sick workers to handle fruit.
- Ensure that workers use the toilets provided, not fields.
- Maintain toilets in a sanitary condition.
- Display hygiene instructions for all workers and visitors
