

## **Employee Health, Safety and Welfare**

This farm's health and safety procedure is to follow all requirements of Washington State Labor and Industries health and safety standards. These standards are available from [www.lni.wa.gov](http://www.lni.wa.gov) and cover all training and workplace safety requirements. These procedures include new employee training on issues identified on the risk assessment. Training records are available for review.

### **AUDIT ADVICE**

All farms must have health and safety procedures that at the very least address issues on the risk assessment in AF 4.1.1.
