

Subcontractors

We do not use the services of subcontractors.

INSTRUCTION

If you use the services of subcontractors you must have a copy of the subcontractor's licenses on file. You must also keep copies of all the training including hygiene that you or the subcontractor has done for the employees working on your ranch. You must also have a copy of an assessment of the subcontractor to the GLOBAL GAP standards.

Notifying Subcontractors and Visitors

AUDIT ADVICE

You must provide evidence that you are notifying all subcontractors and visitors of the relevant procedures on personal safety and hygiene. You can post these in a visible place with signs directing everyone to their location or you can have a visitor sign in sheet where you keep track of visitors.

INSTRUCTION

Post a board where it will be highly visible to anyone entering your property. The board will display all personal safety and hygiene procedures you follow. OR, have a sign in sheet and direct visitors and subcontractors to sign in when they enter the property. A copy of a sign in sheet is included here for you to use.
