

## Chemical Use

A list of current chemicals that can be used on this ranch is available from [www.wsu.edu](http://www.wsu.edu) and [www.cdms.net](http://www.cdms.net) . Because the list is updated frequently we do not have a hard copy available. If there is a question as to whether or not a chemical is authorized for use on a crop grown at this location a review of the product label will be conducted. All products in the storage are to be licensed and labeled for use on the crops being grown at this location.

### AUDIT ADVICE:

Have a copy of the WSU field guide available during your audit.
