

Handling and Filling

Chemical workers are trained in the proper handling and mixing procedures prior to being allowed to mix chemicals. All transport of PPP's shall be in compliance with all applicable legislation. A record of their training is available for review.

INSTRUCTIONS:

All workers handling chemicals must receive annual training on chemical safety and the proper procedures. This training can be conducted by a licensed applicator or an outside trainer. Training should be documented on the training form in AF 4.2.2.
